And

EXAMINER'S REASONS FOR ALLOWANCE

1. Claims 1-13 are allowed.

Examiner's reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

While *Meier et al.* teaches a lumping method for estimating the properties of the behavior of liquid and vapor hydrocarbon phases relative to a reference set consisting of hydrocarbon mixtures is a series of thermodynamic sets resulting from underground hydrocarbon reservoirs and *Watts* teaches, surface conditions encountered during reservoir production, **none of these references taken either alone or in combination with the prior art of record disclose** grouping each one of said hydrocarbon mixtures into at least three constituents (V,I,H), none of these constituents corresponding to a particular selection of base components or pseudo-components that would be used for a detailed compositional descriptions of fluids, the Examiner notes that the prior art teaches that constituents modeled in prior art practices are almost always modeled as pseudo-components, unlike Applicants' claimed method of modeling constituents which expressly claims not using pseudo-components.

(claim 1) "...grouping each one of said hydrocarbon mixtures into at least three constituents (V,I,H), none of these constituents corresponding to a particular selection of base components or pseudo-components that would be used for a detailed compositional descriptions of fluids...", **in combination with the remaining elements and features of the claimed**

invention. It is for these reasons that the Applicants' invention defines over the prior art of record.

2.1 Claims 2-13 are allowed for at least the reason that they depend from an allowed base claim.

2.2 Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim Rejections - 35 USC § 101

3. In view of Applicants' amended claim language, more specifically in view of the amended claim language wherein Applicants' claim actually performing *simulating a production of the hydrocarbon reservoir* has rendered the instant claims tangible, concrete and useful and therefore the previously applied 35 U.S.C. 101 rejections of the claims is withdrawn.

Conclusion

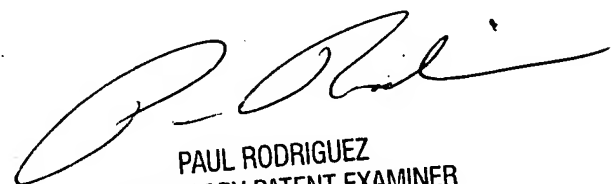

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dwain M. Craig whose telephone number is (571) 272-3710. The examiner can normally be reached on 10:00 - 6:00 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul L. Rodriguez can be reached on (571) 272-3753. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
